[Taylor and Hoyt's Pediatric Ophthalmology and Strabismus 6th Edition +Video](#)

Taylor and Hoyt's Pediatric Ophthalmology and Strabismus, 6th Edition, is an essential resource for clinicians, researchers, and students specializing in pediatric eye care. Authored by renowned experts, Arthur L. Rosenbaum and Alvina K. A. Wong, this comprehensive textbook published by Lippincott Williams & Wilkins combines a robust, evidence-based approach with practical insights, making it an indispensable addition to the library of anyone involved in diagnosing and treating eye disorders in children. The sixth edition has been thoroughly updated to reflect the latest advancements in pediatric ophthalmology and strabismus, including in-depth discussions on innovative diagnostic techniques and therapeutic interventions. The inclusion of video content enhances the learning experience, allowing readers to visualize complex procedures and clinical scenarios in real time. With detailed illustrations, insightful case studies, and an extensive review of pertinent scientific literature, this book serves as both a foundational educational tool and a practical guide for everyday clinical practice. The ISBN for this edition is 978-1496303050, making it easy to find and procure through various booksellers. Whether you are a seasoned ophthalmologist or a medical student venturing into the world of pediatric eye care, Taylor and Hoyt's Pediatric Ophthalmology and Strabismus is your go-to reference for comprehensive knowledge and practical skills in treating children's ocular conditions, ensuring high-quality care and improved outcomes for your young patients.
