[Pediatric Fluid, Electrolyte, and Acid-Base Disorders: A Case-Based Approach 1st Edition](#)

"Pediatric Fluid, Electrolyte, and Acid-Base Disorders: A Case-Based Approach" by Dr. Steven M. L. Leung, published by Elsevier, is an essential resource for pediatric healthcare professionals seeking to deepen their understanding of fluid and electrolyte management in children. This first edition book, bearing the ISBN 978-0323357628, provides a comprehensive examination of common and complex fluid, electrolyte, and acid-base disorders faced in clinical practice. Utilizing a case-based approach, Dr. Leung expertly guides readers through real-life scenarios, enabling them to apply theoretical knowledge to practical situations. Each chapter not only discusses the pathophysiology of various disorders but also emphasizes clinical decision-making and management strategies, thereby equipping practitioners with the essential tools to address these critical issues effectively. The book includes detailed illustrations and summaries of key concepts, highlighting the nuances of pediatric care. It addresses a spectrum of conditions, from dehydration and electrolyte imbalances to more intricate acid-base disturbances, ensuring that readers are well-prepared to make informed decisions in urgent pediatric cases. With its focus on case studies, this text aids in enhancing clinical reasoning and critical thinking skills, making it a perfect addition to any pediatrician's library. Whether you are a trainee or an experienced clinician, this book serves as a vital tool to improve patient outcomes in children, reinforcing the importance of accurate diagnosis and appropriate intervention in pediatric fluid and electrolyte management. Enhance your clinical expertise in pediatric care and ensure the best practices in fluid and electrolyte therapy with this comprehensive guide.
