[Cibas and Ducatman's Cytology: Diagnostic Principles and Clinical Correlates 6th Edition](#)

Cibas and Ducatman's Cytology: Diagnostic Principles and Clinical Correlates, 6th Edition, authored by Dr. David C. Cibas and Dr. Barbara Ducatman, is an essential resource for pathologists, cytotechnologists, and medical students seeking to deepen their understanding of cytology principles and applications in clinical practice. Published by Lippincott Williams & Wilkins, this comprehensive text provides a focused examination of the cytologic techniques used in diagnosis, covering a variety of specimens, including fine-needle aspirations, exfoliative cytology, and cytology from body fluids. With clear, high-quality illustrations and an insightful blend of diagnostic principles and clinical correlates, the book not only enhances diagnostic skills but also bridges the gap between theory and real-world application. The sixth edition features updated content reflecting the latest advancements in the field, including new technologies and diagnostic criteria that are essential for accurate cytological evaluation. Each chapter offers detailed explanations of cytomorphology, histopathologic correlations, and diagnostic pitfalls, making it an invaluable guide for professionals. Whether you're a trainee or a seasoned expert, this book serves as a vital reference to improve diagnostic accuracy, aid in case management, and foster a better understanding of the cytologic findings in relation to patient care. The book's ISBN is 978-1496371023, facilitating easy access for those looking to enrich their knowledge and skills in cytology. Cibas and Ducatman's Cytology remains a trusted companion in the evolving landscape of diagnostic medicine, equipping readers with the essential tools to excel in cytological evaluation and patient outcomes.
