[Nursing Interventions Classification \(NIC\) 7th Edition](#)

Nursing Interventions Classification (NIC) 7th Edition, authored by Mary Ann F. Halter, provides an essential resource for nursing professionals, enhancing their understanding and application of evidence-based interventions in various healthcare settings. Published by Elsevier, this updated edition offers a comprehensive classification system that is crucial for nursing care planning, improving patient outcomes, and fostering effective communication among healthcare providers. The book features over 500 distinct nursing interventions, carefully organized into categories that align with contemporary nursing practice and reflect ongoing advancements in the field. With its user-friendly format, NIC 7th Edition not only supports nurses in documenting care effectively but also serves as an educational tool for nursing students and practitioners seeking to deepen their knowledge of specific interventions. Each intervention is detailed with clear descriptions, including specific activities, expected outcomes, and pertinent nursing diagnoses, making it an invaluable guide for evidence-based practice. The inclusion of new interventions and updates on prior entries ensures that readers are equipped with the latest information to provide high-quality care. The ISBN for this essential text is 978-0323357626, affirming its availability and accessibility for those committed to excellence in nursing practice. By integrating the NIC framework into daily nursing routines, healthcare professionals can enhance their clinical skills, support interdisciplinary collaboration, and ultimately contribute to improved patient care and safety. This edition is a must-have for anyone involved in nursing education, clinical practice, or healthcare administration, as it not only enriches the nursing profession but also plays a pivotal role in elevating the standard of care delivered to patients.
