[Rockwood and Green's Fractures in Adults 10th Edition](#)

"Rockwood and Green's Fractures in Adults, 10th Edition" is an authoritative and essential resource for orthopedic surgeons, residents, and medical professionals specializing in the treatment of fractures. Authored by the renowned Dr. Charles M. Court-Brown, Dr. James D. Heckman, Dr. Margaret M. McQueen, and Dr. Keith R. McKee, this comprehensive text provides in-depth coverage of the complexities of adult fractures, offering the latest advancements in clinical practices and research findings. Published by Lippincott Williams & Wilkins, this edition integrates cutting-edge imaging techniques and surgical approaches, highlighting critical developments in fracture management, including minimally invasive methods and tissue regeneration therapies. With its detailed illustrations, high-quality radiographs, and case studies, this book serves as not only a reference but also a practical guide for effective decision-making in various clinical scenarios. The 10th Edition meticulously addresses the management of fractures in different anatomical regions, emphasizes evidence-based treatment protocols, and incorporates a thorough analysis of complications and their management. Additionally, this edition features contributions from leading global experts, ensuring that readers are equipped with the most current knowledge in fracture care. The ISBN for this essential medical guide is 978-1496348413. Whether you are a practicing surgeon seeking to refine your skills or a resident aiming to master the intricacies of fracture management, "Rockwood and Green's Fractures in Adults" stands as a definitive work that will enhance your understanding and ability to deliver optimal patient care in the field of orthopedics.
