[Liu, Volpe, and Galetta's Neuro-Ophthalmology: Diagnosis and Management 3rd Edition](#)

Neuro-Ophthalmology: Diagnosis and Management, 3rd Edition, by esteemed authors Dr. Andrew G. Liu, Dr. David M. Volpe, and Dr. Jeffrey L. Galetta, is a comprehensive and authoritative resource dedicated to the intricate relationship between neurological disorders and ocular health. Published by McGraw-Hill Education, this updated edition offers a wealth of insights and clinical knowledge, making it an essential reference for medical professionals specializing in neuro-ophthalmology. With its clear and systematic approach, the book delves into the diagnosis and management of complex conditions that affect vision due to neurological issues, covering a broad spectrum of topics including visual pathway disorders, optic nerve diseases, and systemic conditions with ocular implications. The authors, who are leaders in their field, provide in-depth coverage of diagnostic techniques, innovative treatment strategies, and the latest research findings, equipping readers with the tools necessary for effective patient management. The integration of high-quality illustrations and real-world case studies enhances understanding and provides practical guidance for clinicians. This edition has been meticulously updated to reflect advances in medical practice, technology, and emerging therapies, ensuring that readers are well-informed about the latest developments. The ISBN for this invaluable resource is 978-1260479445. Whether you are an experienced neuro-ophthalmologist, a resident in training, or a healthcare professional seeking to broaden your knowledge in this specialized field, Neuro-Ophthalmology: Diagnosis and Management, 3rd Edition is an indispensable tool that will help improve patient outcomes and advance your clinical expertise.
