[Multimodal Imaging Atlas of Cardiac Masses 1st Edition](#)

"Multimodal Imaging Atlas of Cardiac Masses, 1st Edition," authored by Dr. Ahmed K. A. Hassan, is an essential resource for clinicians and medical professionals specializing in cardiology and radiology. Published by Springer in 2022, this comprehensive atlas provides an in-depth exploration of the diverse presentations of cardiac masses through a multimodal imaging approach. With an ISBN of 978-3030955505, this book serves as an invaluable reference for understanding various cardiac tumors, thrombi, and other mass lesions. Featuring high-quality imaging examples from echocardiography, CT, and MRI, it meticulously details the differential diagnosis for each type of cardiac mass, integrating clinical insights with radiological findings. This atlas not only enhances the reader's ability to identify and classify cardiac masses but also emphasizes the importance of a multidisciplinary approach to patient management. The clear and structured layout facilitates easy navigation through complex concepts, making it accessible for both experienced practitioners and those new to the field. By bridging the gap between imaging techniques and clinical practice, "Multimodal Imaging Atlas of Cardiac Masses" equips healthcare providers with the knowledge to improve patient outcomes through accurate diagnosis and treatment planning. Whether you are a cardiologist, radiologist, or a medical student aspiring to gain expertise in cardiac imaging, this book is an essential addition to your medical library. With its wealth of information and practical guidance, it promises to be a definitive guide in the field of cardiac mass evaluation and management.
