[ACoRN: Acute Care of at-Risk Newborns 2nd Edition](#)

ACoRN: Acute Care of at-Risk Newborns, 2nd Edition, authored by the esteemed Dr. H. E. Tan and published by McGraw-Hill Education, serves as an essential guide for healthcare professionals dedicated to the care of vulnerable newborns. With its comprehensive approach, this updated edition provides in-depth insights into the assessment, diagnosis, and management of at-risk infants, integrating the latest clinical evidence and guidelines. The book covers a wide range of topics, from the physiological challenges faced by premature infants to the psychosocial aspects of care for families, ensuring a holistic perspective on neonatal health. Each chapter is meticulously structured, featuring case studies, practical tips, and clinical pearls that enhance the learning experience and equip practitioners with the necessary tools to make informed decisions in fast-paced clinical environments. The 2nd Edition also emphasizes the importance of interprofessional collaboration and family-centered care, making it an invaluable resource for physicians, nurses, and allied health professionals involved in neonatal care. With its clear, accessible language and engaging format, ACoRN is not only a textbook but a vital companion for anyone committed to improving outcomes for at-risk newborns. The ISBN for this highly regarded title is 978-1260465149, making it readily identifiable for those seeking to expand their knowledge in this critical field. Whether you are a seasoned practitioner or a student entering the world of neonatal care, ACoRN stands out as a landmark publication that promises to enhance your understanding and skills, thereby positively impacting the lives of some of the most vulnerable patients in our healthcare system.
