[Hair Transplantation 6th Edition + Video](#)

"Hair Transplantation, 6th Edition" by Dr. Walter P. Unger is an indispensable resource for both novice and experienced professionals in the field of hair restoration. Published by CRC Press, this comprehensive guide delves into the latest advancements in hair transplantation techniques and technologies, making it essential for anyone looking to enhance their understanding of the subject. This sixth edition not only updates key content but also includes a groundbreaking video component, providing visual demonstrations that elucidate complex procedures and techniques. With ISBN 978-1138461389, this book offers an extensive exploration of topics such as follicular unit extraction, graft preparation, patient assessment, and postoperative care, as well as insights into the psychological aspects of hair loss. Dr. Unger, a renowned expert in dermatology and hair restoration, brings decades of experience to the table, ensuring that readers receive the most accurate and up-to-date information available. The richly illustrated and meticulously structured content makes it easy to navigate through intricate details, while the accompanying video helps clarify procedural steps, making it an excellent teaching tool. Whether you're a practitioner aiming to refine your skills or a student eager to learn from the best, "Hair Transplantation, 6th Edition" is your gateway to mastering the art and science of hair restoration. Its reader-friendly layout and authoritative insights render it not only an academic necessity but also a practical guide you'll turn to repeatedly for all your hair transplant concerns. Invest in your professional library with this definitive edition that captures the evolving landscape of hair transplantation and sets the standard for excellence in the field.
