[Overcoming Functional Neurological Symptoms: A Five Areas Approach 1st Edition](#)

"Overcoming Functional Neurological Symptoms: A Five Areas Approach," authored by W. Curt La France Jr. and published by Oxford University Press, is a groundbreaking resource that offers a comprehensive framework for understanding and addressing functional neurological symptoms (FNS). This first edition, bearing the ISBN 9780198847153, provides readers with an insightful exploration of the intersection between neurology and psychology, revealing how psychological factors can contribute to neurological symptoms that may not have a clear medical diagnosis. La France, a leading expert in the field, presents a structured Five Areas Approach that focuses on physical, psychological, social, and environmental factors, equipping healthcare professionals and patients alike with practical tools for effective intervention and recovery. Drawing from a wealth of clinical experience and the latest research, this book delves into case studies and real-world applications, making it an essential guide for neurologists, psychologists, physiotherapists, and multidisciplinary teams working with patients experiencing FNS. Whether you are a practitioner seeking to expand your therapeutic arsenal or a patient looking for a clearer path to recovery, "Overcoming Functional Neurological Symptoms" combines expert insight with actionable strategies, fostering a deeper understanding and offering hope for those affected by these complex symptoms. Suitable for both academic and clinical settings, this book aims to demystify FNS and empower readers to navigate the challenges of these perplexing conditions. Embrace the transformative insights of La France's Five Areas Approach and take the first step towards overcoming functional neurological symptoms today.
