[Zipes and Jalife's Cardiac Electrophysiology: From Cell to Bedside 8th Edition + Video](#)

"Zipes and Jalife's Cardiac Electrophysiology: From Cell to Bedside, 8th Edition" is an essential resource for healthcare professionals seeking a comprehensive understanding of cardiac electrophysiology. Authored by the esteemed experts David P. Zipes and Jose Jalife, this extensively updated edition reflects the latest advances in the field, bridging basic science and clinical practice with clarity and depth. Published by Elsevier, this edition includes enhanced visual features, updated clinical guidelines, and access to supplementary video content that reinforces key concepts and provides practical insights into patient care. The book meticulously covers topics such as electrophysiological mechanisms, arrhythmia management, and innovative therapeutic approaches, making it invaluable for cardiologists, electrophysiologists, and medical students. The inclusion of cutting-edge research and clinical case studies ensures that readers are equipped with the most current information and skills necessary for effective diagnosis and treatment. With a focus on translating complex scientific concepts into applicable knowledge, this resource serves as both a textbook and a clinical reference, guiding readers through the intricacies of cardiac function from the cellular level to the bedside. The 8th Edition is designed for optimal learning, featuring multiple illustrations and summary tables that enhance understanding, making it easier for practitioners to implement theories in real-world settings. The ISBN for this authoritative text is 978-0323357628. Whether you are preparing for exams, looking to expand your clinical knowledge, or seeking updated guidelines in electrophysiology, "Zipes and Jalife's Cardiac Electrophysiology" is an indispensable tool for your medical library.
