Maternal Cardiac Care: A Guide to Managing Pregnant Women with Heart Disease 1st Edition

"Maternal Cardiac Care: A Guide to Managing Pregnant Women with Heart Disease" is a vital resource for healthcare professionals navigating the complexities of managing heart disease in expectant mothers. Authored by esteemed cardiologist Dr. Lisa M. Murdock and published by Springer, this comprehensive guide delivers evidence-based insights and practical approaches to enhance the care of pregnant women with cardiovascular conditions. With the ISBN 978-3030858473, this first edition addresses a critical gap in maternal-fetal medicine, emphasizing the importance of tailored treatment plans that prioritize both maternal and fetal well-being. The book covers various aspects of cardiac care during pregnancy, including preconception counselling, risk assessment, and management strategies for various cardiac conditions such as congenital heart defects, valvular heart disease, and hypertension. Each chapter is meticulously structured to provide clinicians with a clear framework for diagnosis and treatment, ensuring that they are equipped with the latest clinical guidelines and research findings. Dr. Murdock's expertise shines through as she delves into case studies and real-world applications, making this guide an essential tool for obstetricians, cardiologists, maternal-fetal medicine specialists, and nursing staff. Whether you are looking to deepen your understanding of heart disease in pregnancy or seeking actionable strategies for patient care, "Maternal Cardiac Care" is an indispensable addition to your medical library. Equip yourself with the knowledge and skills necessary to make informed clinical decisions, improve outcomes for mothers and their babies, and navigate the unique challenges presented by cardiac issues in pregnancy. This groundbreaking text is not just a guide; it's a commitment to advancing maternal cardiac health and providing hope for countless families.
