[Diagnostic Pathology: Intraoperative Consultation 3rd Edition](#)

"Diagnostic Pathology: Intraoperative Consultation, 3rd Edition," authored by Michael J. M. O'Leary and published by Elsevier, is an essential reference for pathologists, surgeons, and medical professionals involved in intraoperative assessments. This comprehensive volume, with the ISBN 978-0323357220, offers a detailed exploration of the rapidly evolving field of intraoperative pathology, emphasizing the critical role that timely and accurate consultations play in patient management. The third edition presents an extensive collection of high-quality images and case studies, ensuring readers grasp the latest techniques and methodologies in intraoperative diagnostics. Organized systematically, the book covers a diverse range of topics, including but not limited to frozen section analysis, the evaluation of neoplastic and non-neoplastic lesions, and strategies for optimizing intraoperative consultations. This edition has been meticulously updated to reflect the most recent advances in the field, incorporating new research and case examples that highlight current best practices. With contributions from leading experts, "Diagnostic Pathology: Intraoperative Consultation" not only aids in honing diagnostic skills but also serves as a vital resource for decision-making and improving surgical outcomes. Whether you are a seasoned pathologist seeking to enhance your expertise or a resident aiming to build a solid foundation in intraoperative pathology, this book is an invaluable addition to your library. Dive into the intricacies of intraoperative consultations with this authoritative guide that combines expert knowledge with practical applications, ensuring you stay at the forefront of diagnostic pathology.
