[Goldfrank's Toxicologic Emergencies 10th Edition](#)

"Goldfrank's Toxicologic Emergencies 10th Edition," authored by Lewis S. Goldfrank, is an essential resource for healthcare professionals dealing with acute toxicological situations. Published by McGraw-Hill Education, this comprehensive volume, with ISBN 978-1260455332, serves as a critical guide for emergency medicine practitioners, toxicologists, and public health officials. This latest edition brings together the expertise of a diverse team of contributors, offering up-to-date insights into the management of toxic exposures and poisoning scenarios. With an emphasis on evidence-based practice, the text covers a wide range of topics, including drug overdose, environmental toxins, and the latest therapeutic interventions. The book features detailed sections on clinical presentations, diagnosis, and treatment protocols, empowering readers to make informed decisions in the high-stakes environment of emergency care. Illustrated with full-color images and tables, it enhances understanding and facilitates quick reference in urgent situations. The inclusion of contemporary guidelines and case studies further enriches the reader's learning experience, making it not only a valuable textbook but also a practical tool for everyday use. Whether you are a seasoned practitioner or a medical student, "Goldfrank's Toxicologic Emergencies 10th Edition" is an indispensable addition to your library, equipping you with the knowledge to effectively respond to toxicologic emergencies and improve patient outcomes.
